Quant III

Lab 1: Logistics and R Basics

Junlong Aaron Zhou

September 11, 2020

Outline

- Lab time
- Logistics
- Today

Lab time

- Potential options
  - Friday: 10 am - 11:50 am;
  - Wendsday: 2pm - 6 pm;
  - Thursday: 3pm - 6 pm;
  - Or 6-8 pm or 7-9 pm during the week? (Thursday?)
  - 12-2? (Workshop though)

Logistics

- Lab Sessions
  - Time and future links will be sent.
  - Mostly: R code in RStudio
  - Some Recap: time allows
  - Deviation of results
  - Materials are available on dropbox.

Homework

- Individual work

Homework

- Individual work
- Discussion is allowed but do submit separate work

Homework

- Individual work
- Discussion is allowed but do submit separate work
- Submission:
  - Before class
  - A printed writeup in pdf (use LaTeXor RMarkdown)
  - Email me the **replication code as a separate .R file**. It should run as submitted.

Homework

- Individual work
- Discussion is allowed but do submit separate work
- Submission:
  - Before class
  - A printed writeup in pdf (use LaTeXor RMarkdown)
  - Email me the **replication code as a separate .R file**. It should run as submitted.
- NB!
  - You're required to show **ALL** your derivations. Be pedantic, don't lose credits for nothing!
  - Put code snippets inside the body of the answer.
  - Rmarkdown is recommended but not required.

Today

- Basic R coding
  - Functions
  - Data structures
  - Memory and vectorization
  - Conditions and loops
  - Data manipulation
  - Simulation
